Commitment to achieving Net Zero

Bravtech Limited is committed to achieving Net Zero emissions by 2026.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 10 tCO₂e by 2025. This is a reduction of 10%

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to XX tCO₂e, a XX%ge reduction against the 2023 baseline and the measures will be in effect when performing the contract

In the future we hope to implement further measures such as:
